

FAQ Kit SARS-CoV-2

1. Handling during use

1.1 Risk of infection

Can I contract the SARS-CoV-2 coronavirus during the analysis of the wastewater sample?

There is no evidence that the SARS-CoV-2 coronavirus can be transmitted through wastewater. Although the virus can be detected in wastewater, there is no evidence that the sample poses a risk of infection ([WHO](#)).

2. Handling after use

2.1 Disposal

How should the Kit SARS-CoV-2 be disposed of?

All components can be disposed of with household waste according to local regulations. Therefore, autoclaving is not required.

2.2 Single-use or reusable parts

Are the materials, such as detection modules, reusable?

All components of the kit are designed for single use. However, Endress+Hauser is actively committed to environmental protection and continuously works to promote sustainable solutions.
