

FAQ Kit Spoilage Bacteria Screen

1. Handling after use

1.1 Disposal

How should the Kit Spoilage Bacteria Screen be disposed of?

All components can be disposed of with household waste according to local regulations. Therefore, autoclaving is not required.

1.2 Single-use or reusable parts

Are the materials, such as detection modules, reusable?

All components of the kit are designed for single use. However, Endress+Hauser is actively committed to environmental protection and continuously works to promote sustainable solutions.

1.3 Cross-contamination

Is there any cause for concern regarding possible cross-contamination?

Since the samples are analyzed in a closed system, there is no reason to assume cross-contamination.

2. Product details

2.1 Distinction from the Kit Spoilage Bacteria Ident

How does the Kit differ from the Kit Spoilage Bacteria Ident?

The Kits Spoilage Bacteria Ident identify specific spoilage bacteria and hop resistance genes, while the Kit Spoilage Bacteria Screen detects important spoilage bacteria groups and hop resistance genes.

2.2 Approved sample types

What types of samples can I test with the Kit Spoilage Bacteria Screen?

Class	Sample type	Explanation
<p>Swab samples</p> 	Swab sample on surfaces	Approved
<p>Liquid samples</p> 	<p>Water samples: Drinking water, process water, carbonated water, still water</p>	<p>Approved</p> <p>Carbonated water is only approved in combination with the TCT workflow. If tested directly, there is a risk of incorrect results and malfunctions in the Device BAB00.</p>
	<p>Beer samples: Samples from production line, filtered beer, unfiltered beer, non-alcoholic beer</p>	Approved
	<p>Beer samples: Dark beers, shandies</p>	<p>Approved</p> <p>An additional module is required for use. This is available free of charge as an add-on to the Kit by contacting orders.ehbs@endress.com and quoting reference number B-2023.</p>
	After enrichment	Approved
<p>Colonies</p> 	Picking a colony	Approved
